

# The Future of Embedded Systems is Here

Introducing our hardware in the loop solution for nRF5340 Development

## Key Features

Seamless Development Environment

Fully Functional CI/CD Pipeline

Hardware In The Loop Testing

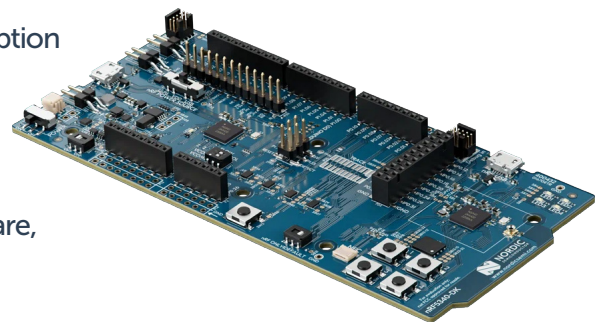

Boost In Overall Efficiency

Accelerated Time-to-Market

## Get Started with EmbedOps<sup>®</sup>

1. Head to <https://app.embedops.io/signup> to activate your subscription
2. Use our Quick Start guide to get started  
[https://docs.embedops.io/hil/tutorials/quick\\_start/](https://docs.embedops.io/hil/tutorials/quick_start/)
3. Experiment with constructing your project, configuring the hardware, and executing the supplied Hardware-in-the-Loop (HIL) tests
4. Contact us with questions! Email [support@dojofive.com](mailto:support@dojofive.com) or visit [www.dojofive.com](http://www.dojofive.com)
